MEGALIFE HE

CISTERN-FED HOT WATER

Megalife HE & Megalife HE Solar.

Modern, cistern-fed hot
water cylinders for superior
reliability and efficiency.

Affordable, modern solutions can often be at the top of your list when looking to replace or update the hot water solution in your home.

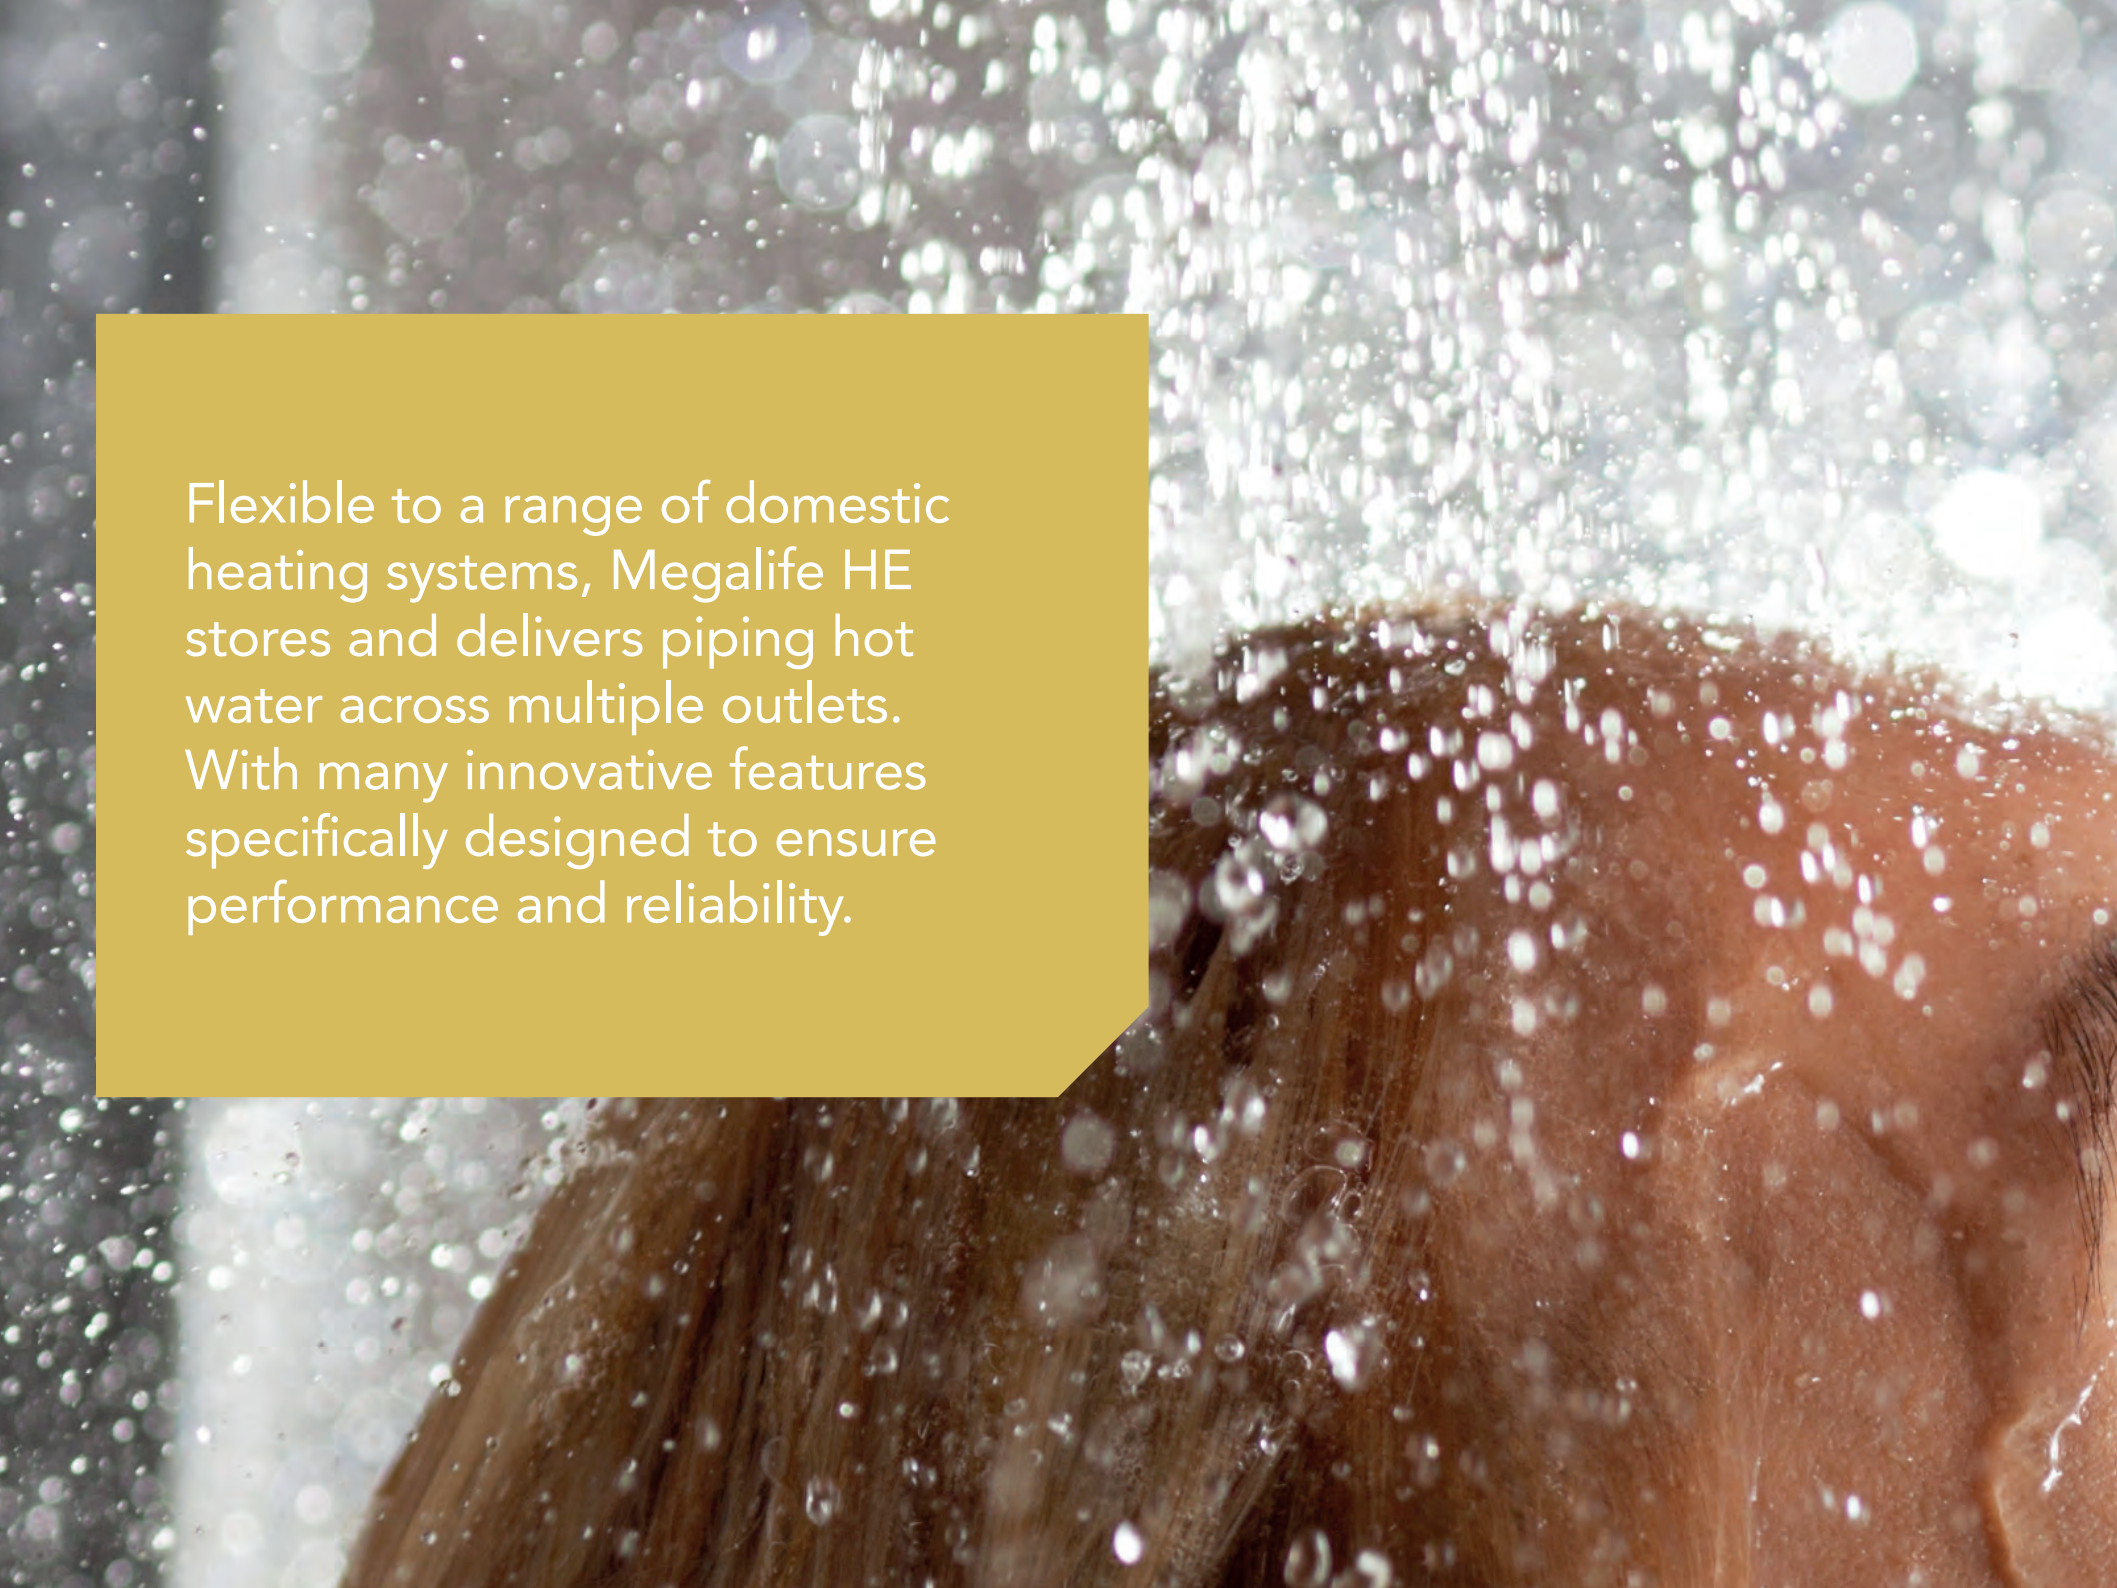

Our team at Heatrae Sadia understand this, which is why we have developed Megalife HE – a modern, cistern-fed water heating system that delivers a reliable and efficient solution for modernised outlets.

Designed using advanced vented water heating technology, our Megalife HE system comes with a 25 year transferable cylinder warranty, including parts and labour with on-site service support.*

**T&Cs apply please visit heatraesadia.com for details of full product warranties.*

Flexible to a range of domestic heating systems, Megalife HE stores and delivers piping hot water across multiple outlets. With many innovative features specifically designed to ensure performance and reliability.

Equally suited to refurbishment or new build projects, Megalife HE and Megalife HE Solar are built to the highest standard from Duplex stainless steel which is corrosion resistant even in aggressive water areas. Every indirect Megalife HE cylinder features a high performance 'coil-in-coil' heat exchanger which will recover in less than half the time taken by a coil that meets the British Standard. This high performance coil provides greater energy efficiency and more baths per hour.

Megalife HE Solar has been specifically designed to provide a balance between the dedicated solar heating capacity and the immersion or boiler heated capacity.

This dedicated technology ensures that the maximum benefits are gained through solar power but will also provide sufficient hot water to the home during cloudy days and winter months.

MEGALIFE HE

Cost effective reliability

Made from Duplex stainless steel, Megalife HE is the perfect upgrade from a traditional copper cylinder, delivering powerful pressure for showers and fast filling baths.

Using our market-leading manufacturing techniques, the Megalife HE boasts a number of innovative features which ensure high levels of operating efficiency.

Megalife HE has a fast recovery coil and 50mm thick insulation to minimise heat loss and maximise performance.

MEGALIFE HE SOLAR

Renewable technology

Megalife HE Solar works with solar panel technology to make the most of renewable energy without losing the powerful pressure it's known for.

We designed a heating coil specifically for Megalife HE Solar which maximises heat input and efficiency from the solar energy captured.

Megalife HE Solar is compatible with a wide range of UK solar systems, has reduced carbon emissions and lower running costs.

ORDERING GUIDES

MEGALIFE HE

Product	H	W	Empty	Full	ErP rating	Order Code
	mm	mm	kg	kg		
Megalife HE 100 indirect	813	550	25	125	B	95.030:710
