

## Energy Statement

### Policy

As part of the company's environmental strategy, Heatrae Sadia is committed to responsible energy management and continual improvement in its energy performance. It will aim to establish and adopt cost-effective, environmentally-responsible practices for energy use throughout its operation, premises, plant and equipment.

Heatrae Sadia will manage its energy consumption by:-

- Monitoring the energy usage and make the information available to all employees.
- Promoting energy awareness in all staff.
- Conducting regular reviews of objectives and targets and identify opportunities to reduce usage.
- Implementing energy-efficient alternatives where it is cost effective to do so.
- Providing resource necessary to achieve its objectives and targets.
- Support the purchase of energy efficient products and services.
- Comply with all applicable legal and other requirements.
- Reduce where possible the use and consumption of fossil fuels.
- Investigate the use of renewable technologies.
- Design and produce market leading energy efficient products.

### Objectives

- Improve the efficiency in the use of Electricity.
- Improve the efficiency in the use of Natural gas.
- Reduce the overall Co2 emissions.
