

Environmental Statement

Policy

Our goal is to operate an effective Environmental Management System that identifies risk and opportunities to make the most effective use of resources to ensure that our activities, products and associated services minimise any negative or potentially negative impact on the environment.

We value our reputation as an environmentally conscious and responsible business and actively engaging our people and key stakeholders to ensure they comply with our policies and procedures designed to support this.

By applying and adhering to these principles, we will behave in an environmentally conscious way, seeking opportunities to reduce the negative impact of our activities on the world in which we live.

Objectives

- Compliance to all relevant environmental standards, laws, other requirements, best practice and guidelines.
- Prevention of pollution at source, by design, mode of operation and the use of an effective management system.
- Involvement of all our people in support of our Environmental Policy.
- Review of objectives and targets based on reduction of waste and the consumption of resources to minimise our negative impact on the environment.
- Continual improvement of the Environmental Management System to enhance environmental performance.
